SEBASTIÁN SOLÓRZANO

CYBERSECURITY ANALYST | COMPUTER ENGINEER

👤 ABOUT

Detail-oriented and proactive Cybersecurity Analyst with experience in threat monitoring and basic incident response. Adept at identifying, analyzing, and mitigating security risks through the use of advanced tools and techniques with a methodical approach to incident investigation and strong problem-solving skills. Experienced in ensuring the security and integrity of critical systems and data, while collaborating with cross-functional teams to strengthen organizational defenses. Passionate about staying ahead of evolving cybersecurity threats and implementing best practices to safeguard digital assets.

💼 WORK EXPERIENCE

Equifax
🌐 https://www.equifax.com
July 2023 – Now

Cybersecurity Operations Analyst Tier 2

Work as a Cybersecurity Analyst specialized in threat monitoring and basic incident response.

Highlights

Monitor and investigate cyber incidents using a variety of tools, including EDR systems, SIEM platforms, and automated email threat detection tools like ETP or GSuite. Conduct thorough investigations of alerts from intrusion detection systems, as well as Windows, Linux, Mac systems, and network infrastructure.

Implement effective response measures and mitigation strategies to safeguard organizational assets from potential security threats.

Identify opportunities to optimize threat detection processes, collaborating with the engineering team to reduce false positives by refining detection rules, validating and approving new detections, reviewing and updating existing internal processes documentation.

Provide regular coaching and training to junior analysts. Perform weekly Quality Assurance evaluations on investigations performed by tier 1 analysts.

Collaborate closely with tier 1 and tier 3 during high severity incidents, applying strong analytical and communication skills to determine the appropriate escalation points and ensure timely and effective incident resolution.

✿ AWARDS

March 2019

SCRUMstudy

🏆 Scrum Fundamentals Certified

Successfully passed the Scrum Fundamentals Certified exam.

March 2023

EF Standard English Test (EF SET)

🏆 EFSET English Certificate 87/100 (C2 Proficient)

Successfully completed the EF SET Certificate and earned the English level of C2 Proficient according to the Common European Framework of Reference (CEFR).
